

Propuestas para una minería sustentable a gran escala

The competence center for mining and raw materials of the AHK Peru is organizing an online seminar on sustainability in mining in cooperation with the Saxony Economic Development Corporation.

In the online seminar held in Spanish, German institutions and companies share their expertise and experiences for sustainable processes in the mining sector with a focus on large-scale Peruvian mining.

Dr. Roland Giese from our member DGFZ Dresden presents the case study

Recuperación de cuencas acuáticas con el cierre y la gestión de pasivos ambientales en minas de Alemania y de la region andina. – Un estudio comparativo de experiencias positivas en la gestión de sitios contaminados acquired and coordinated by the GKZ.

Further informationen on the programm and registration you find here:
